# Why TOCCA Pro?

## For quality that shines through

Introducing **TOCCA Pro**, a bespoke, illuminated handrail system that combines style and performance to deliver high quality lighting for internal and external applications.

With four LED modules available to provide a wide range of light levels and colour temperatures, plus a choice of symmetric and asymmetric distributions, TOCCA Pro offers a versatile and virtually maintenance-free solution that can be tailored to the individual needs of your project.

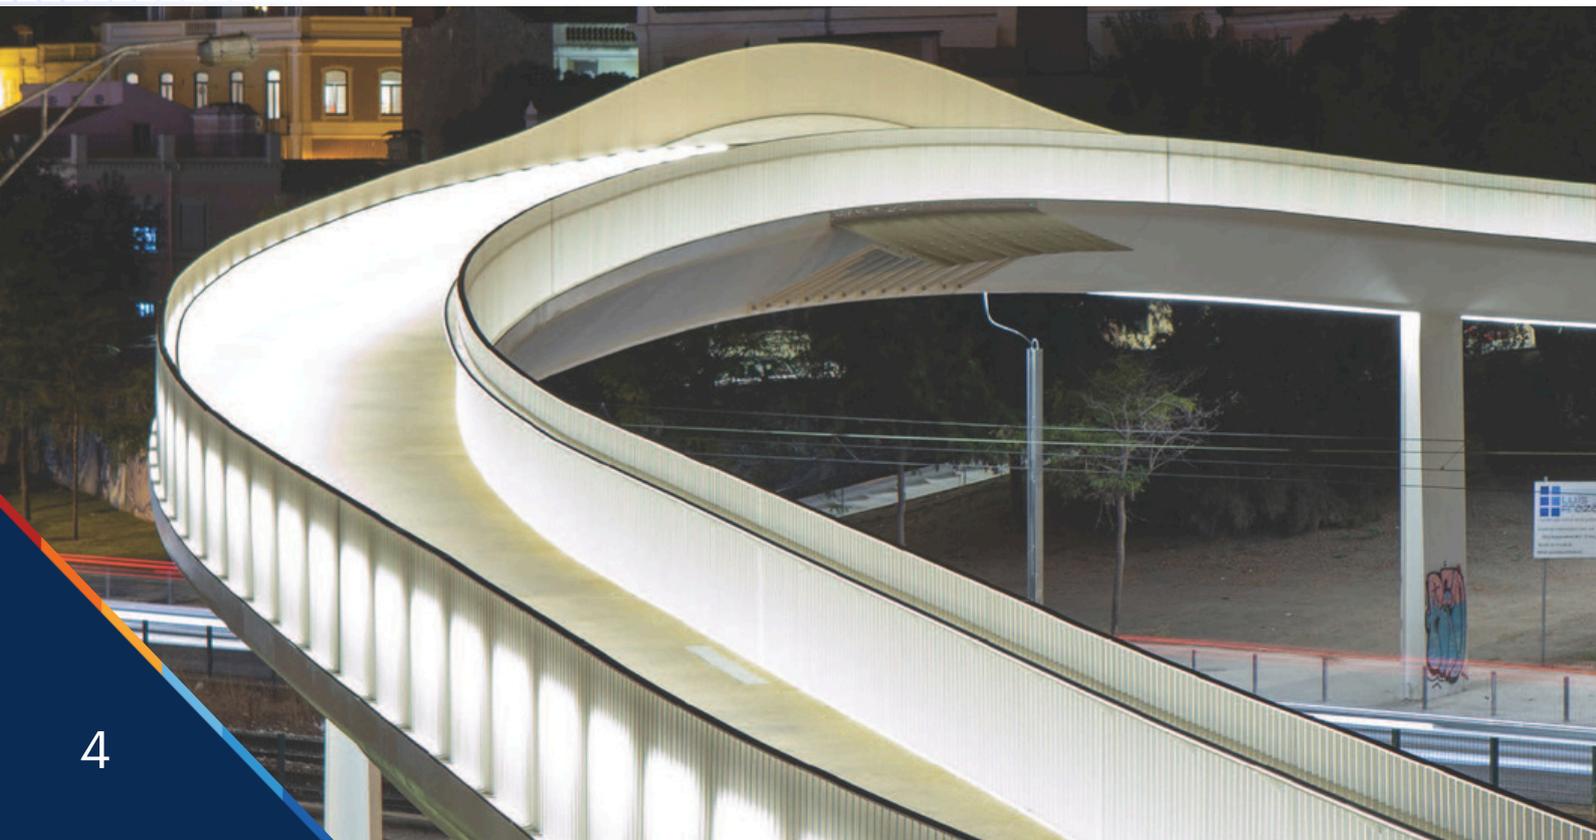

# Key benefits

**The TOCCA Pro is a refined, high-performance lighting solution designed for architectural integration.**

Available with Classic or Comfort illumination options, this sleek handrail system delivers exceptional uniformity and visual comfort, harmoniously blending into public realm environments as well as private and commercial developments.

## **Features and Benefits:**

- Fast and simple self-installation system
- Variable Corner Joint – Accommodates directional changes with ease.
- Fixed Corner Joint – Links sections together at a fixed 90° angle.
- End Cap – Provides a neat, stylish finish to complete the installation.

# Our full-service solution

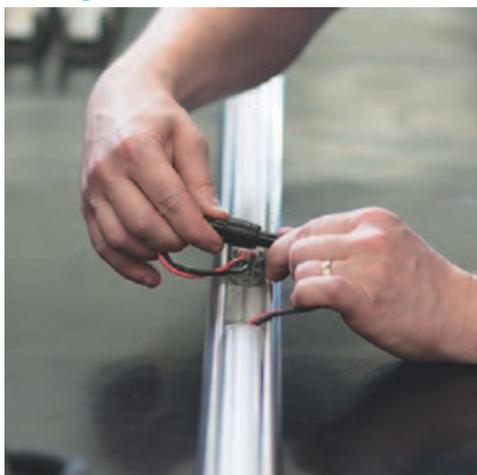

**Aided by our expert team of designers, engineers and installers, we support your project at every step.**

We'll ask the right questions, at the right time to ensure your scheme is successfully delivered on time, and within budget.

## Service

Supporting you from concept to completion. When you specify a TOCCA Pro handrail, you're in safe hands. Kingfisher Lighting can manage all aspects of your scheme, offering you complete peace of mind.

# Profiles

## Quality that can be seen, felt and admired

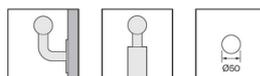

TOCCA Pro handrails are hand-crafted from the highest grade materials, delivering beautiful solutions that you'll want to reach out and touch.

Whether you're looking for **elegance** or have **safety** in mind, we have the right profile and finish for you.

## Stainless Steel Kit

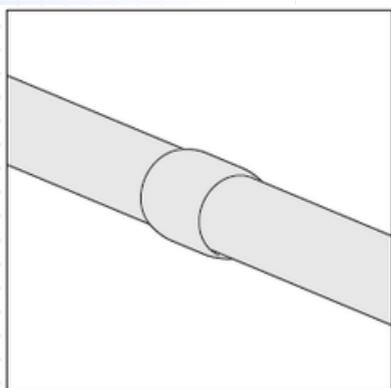

This modular system is highly adaptable and perfectly suited to any scheme. Engineered to support self-installation, TOCCA Pro bypasses the need for welding on site. Joints are concealed and changes of direction are easily accommodated thanks to fixed and variable corner sections.

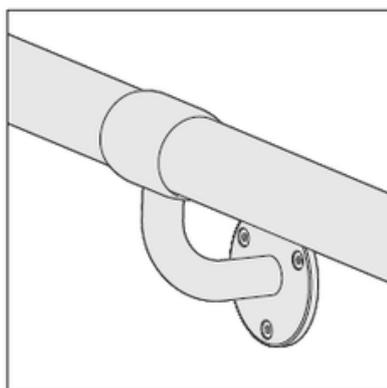

# Versatile System

TOCCA Pro is the ideal solution for time sensitive installations. Designed for self-installation, the versatile system provides added flexibility on-site and can be easily customised thanks to a number of additional components.

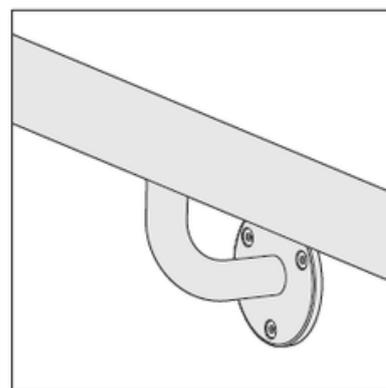

## Inline Splice

Connects one TOCCA Pro handrail section to another.

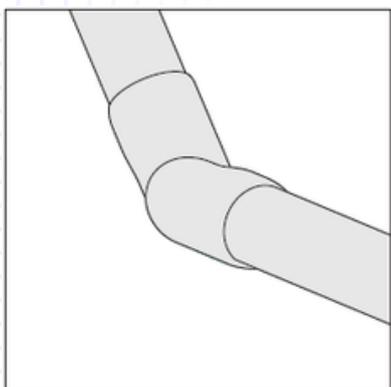

## Splice Wall Bracket

Joins two handrail sections whilst also providing a mounting point.

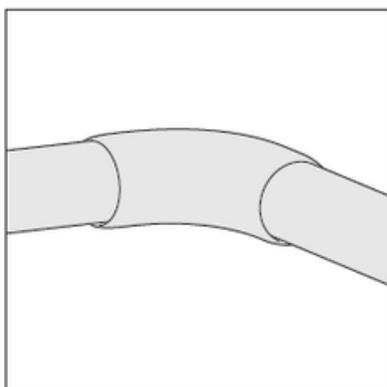

## Flexible Wall Bracket

Attaches at any point to provide a flush wall mounting point.

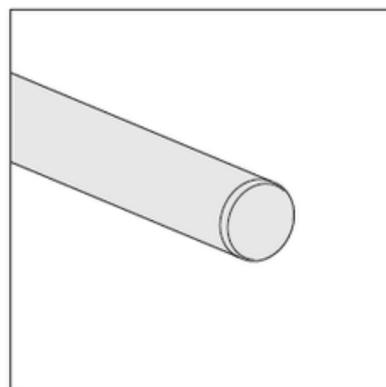

## Variable Corner Joint

Designed to easily accommodate changes in direction.

## Fixed Corner Joint

Links two TOCCA Pro handrail sections together at a fixed 90 ° angle.

## End Cap

Stylish end cap to complete your TOCCA Pro handrail installation.

## Innovative Fastening System

With TOCCA Pro, handrail sections are securely joined together using an innovative fastening system. Housed within the handrail, tube clamps allow sections to be connected without any visible fixing points.

# Illumination options

## TOCCA Pro (classic)

Our most versatile module, TOCCA pro classic illumination offers both symmetric and asymmetric distributions in a variety of colour temperatures, making it suitable for a wide range of handrail applications.

### Delivered Lumens

	2700K (lm)	3000K (lm)	4000K (lm)
<b>Symmetric Module</b>			
300 mm	201	281	335
600 mm	402	563	670
900 mm	602	843	1004
1200 mm	803	1126	1338

### Asymmetric Module

300 mm	146	204	244
600 mm	293	410	489
900 mm	440	616	733
1200 mm	586	821	977

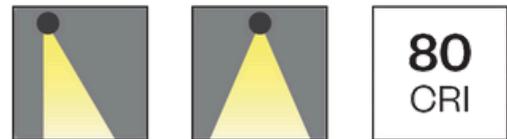

### Power Ratings
