

NAVAR Series

The Future of Exterior Lighting

Kingfisher Lighting

Part of the LUCECO® group of companies

Distinctive Products, Outstanding Service

Built on a foundation of quality product design that encapsulates performance, efficiency and style, Kingfisher Lighting focus on bespoke end-to-end solutions to perfectly serve the specification of clients and surrounding environments.

Wrap-around services combine comprehensive project design and management, as well as offering technical support throughout. This together with 3D visualisations, BIM data, return on investment and energy calculations, ensures that projects are delivered to the highest standard.

Introducing The NAVAR Series

Versatility and innovation inspired the creation of the NAVAR series. Encompassing a high-quality build and using only premium components, this unique collection offers maximised spacings for a range of project specifications.

With over 280 configurations as standard and a vast array of options including colour temperatures, control packages and bespoke bracketry ensures that the NAVAR series offers unique solutions for any specification.

Bespoke Optical Package

This unique system offers four core optical packages allowing for the perfect illumination to be achieved project-wide without compromising on quality or performance.

Efficiency as Standard

Build quality, optical arrangements and tier one components contribute to the reduction in the number of luminaires per project, promoting efficiency, as well as energy and cost savings across the board.

Exceptional Spacings

With over 30m spacings achievable on specific projects, the NAVAR Series maintains excellent uniformity and offers a powerful distribution.

0% ULOR

Advanced power and performance, NAVAR produces an impressive output whilst maintaining minimal upward light supporting the reduction in obtrusive light and light pollution

Versatile

With over 280 configurations as standard, NAVAR is one of the most versatile luminaires on the market promoting harmonious aesthetics.

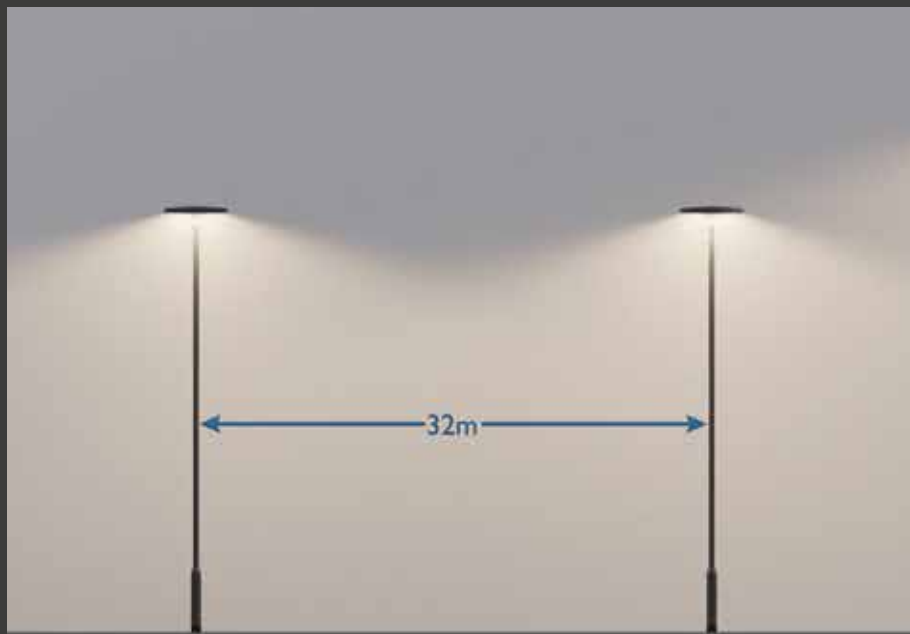

Sustainable

Manufactured to a circular economy model, NAVAR supports the 'reduce, reuse, recycle' ethos ensuring all components can be repaired and replaced.

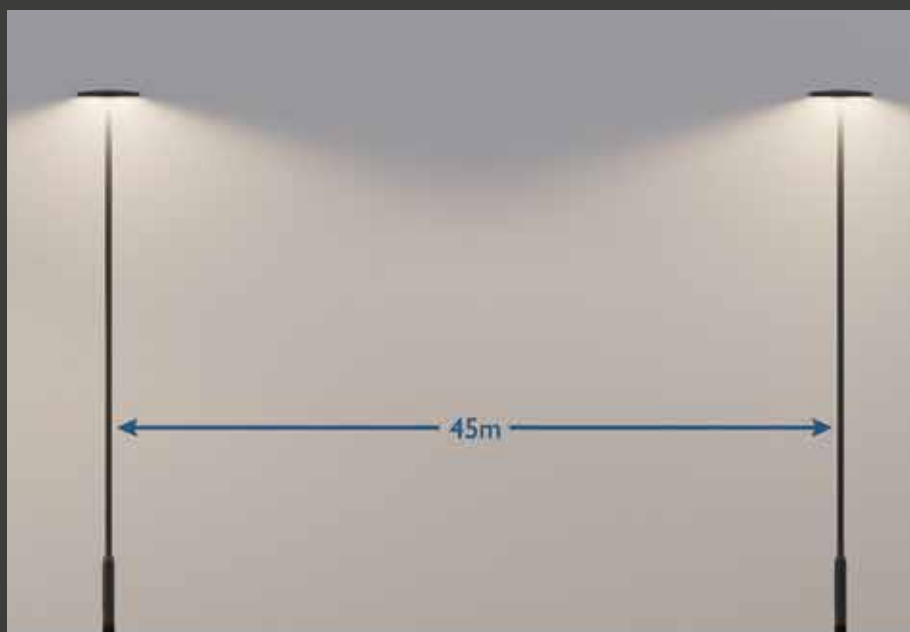

Exceptional Spacings

The NAVAR Series has been designed to maximise spacings, encouraging comprehensive cost savings from day one. With a reduction in the number of luminaires required, savings can be seen on hardware, installation fees, maintenance time, as well as energy consumption.

Optical System

The NAVAR Series hosts a versatile optical system to create the perfect illumination for your site. The varied selection can suit specifications for not only car parks but also open areas, roadways, pathways and perimeter lighting.

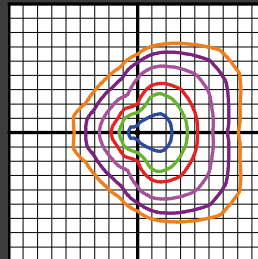

Square Distribution - SQ70

Designed at Kingfisher HQ, the SQ70 optic was created in order to maximise spacings on site but also ensures when sites require a lighting upgrade that lux levels are matched to previous technology. This market-leading optic allows NAVAR to achieve excellent levels and uniformity to meet any site specifications.

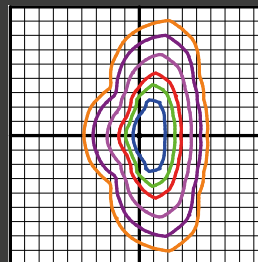

Forward Throw - FW70

Perfectly suited to perimeter lighting, the FW70 optic promotes an asymmetric illumination ideal for boundary positioning. Created with light intrusion in mind, it has minimal back spill protecting surrounding residential areas or wildlife habitats.

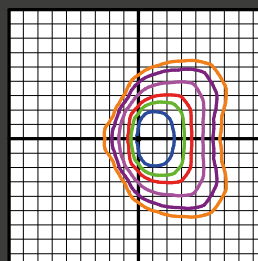

Asymmetrical Distribution - AY70

Illuminating roadways, pathways and narrow spaces this optic boasts versatility for your site. Once combined with the FW70, it will create an excellent uniformity rating across.

Forward Throw with Spill Shield - FWB70

Produced to eliminate back spill, this unique luminaire is perfect for areas with concerns for ecological issues such as wildlife areas. With an integrated spill shield, this optic allows a better cut off of light.

NAVAR Urban

Key Features

- 62.0W – 158.0W
- 7,940 – 18,501 Luminaire Lumens
- Efficacy up to 139.0 lm/W
- 2700K & 4000K
- 0% ULOR
- Flat-to-Ground
- Marine Grade Finish
- Designed & Engineered in UK

Specification

Weight:	15.0kg
Windage:	0.071m ²
Material:	Die-cast Aluminium
Paint:	RAL 7016 Anthracite Grey
Finish:	Marine Finish
